

Marin County IPM Program
Application for Limited Use and Notification Exemption

Person requesting: Dave Hattem Date: 10/17/11

Department: Parks Phone: 415-507-4046

Proposed Material: Fusilade II EPA Reg. No. 100-1084

Active Ingredient: Fluazifop-P-Butyl Technical (24.5%)

Amount of Material Needed: Up to 4 oz.

Location of Proposed Use: Meriam Drive Median Islands (CSA#9) – Isolated patches of Bermuda grass growing in shrubs.

Reason why Restricted:* This Product is not on the Allowed List. Fluazifop is not likely to be a carcinogen. It may have reproductive toxicity.

Reason for Need: Bermuda grass at the median islands has been pulled and mulched. There are Bermuda grass plants inside landscape plants that will spread and take over shrub areas.

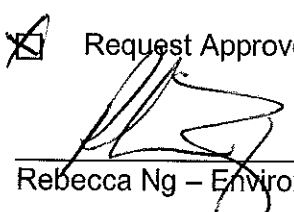

Options/Alternatives: The alternative for getting rid of Bermuda in broad leafed shrubs is to remove the shrub, dig out the Bermuda, plant a new shrub and hope. Bermuda grass is very tenacious and even a small piece can start the infestation again.

Plan to Preclude Future Use: Eliminate the Bermuda grass inside shrubs. Hand pull as much of the Bermuda grass as possible.

Time Period Needed: Desired application date: one day between 10/24/30—11/4/11 (TBA)

Request Approved,

Request Denied
