San Geronimo Valley
Salmonid Enhancement Community Workshop 2
Exit Poll**

1. What worked well, or what did you like about this workshop?

- Good info from small groups that did much research.
Chance to talk to neighbors.
- Good facilitator. Stayed on subject
- Very informative / educational
- Talking with Tom from the CAP was good.
2nd half – Hearing from people at the break-out tables was informative.
- Workshops
- Community input and openness
- Information moved along quickly.
- Not enough participation by groups other than stewards [stewards]
- Information – received good – Hand outs helpful –
- County listened – felt there is a path to follow
- This was my first SGV workshop – very good
- People listened & came up with new ideas
- Gave Community an opportunity to express fears & needs.
Gave Community members an opportunity to share what they have learned.
- Dani keeps us on track.
Everyone had similar goals / respectful of differences.
- Well informed groups with good solutions.
- The format was good. In the future, keep the balance of presentation & interactive discussion.
- Presentations were well done; clear and well organized. Time management was good.
- Great to have the County facilitators (CEA)
The reports were excellent & helpful
Format was good
- Much more focus than other meetings
Good attitudes.
- everything !
- Everyone got along.

2. What didn't work well / could use rethinking?

- Statement made by County re "law suit" seemed political & dishonest. Decreases trust cause most know the truth – Be honest, Not political !
- A lot more time need to be allocated for these discussions
- Everyone is very polite & appreciative of the work of others – I think various people (speakers or those in charge) don't actually answer specific questions – due to politics or whatever.
- Identifying goals / problems, alternatives
- Confusion on how the process will play out. Where is this going?
- Meet earlier in the day
- Need more communication to inform or reach residents
- Need shorter first presentations (time limit)
- Too much ambient noise in the room – hard to hear speakers –
- Can't think of anything that did not work well
- We need a show & tell by this County and then try to arrange on by the DFG, NOAA, MMWD, RWQCB.
- I thought the meeting was great. Task groups good way to get this done. A lot packed into 4 hours. Maybe unavoidable.
- Seemed to work well
- Better sound system
- There was junk food offer instead of healthy snacks.

3. Give us some ideas to improve our forums, outreach, and/or overall communications with your community

- More outreach to get more people involved. Some already got burned out from past negative meetings, need to show them it's better now & ask them to try again.
- Have them more often. Get information out to all stake holders.
- Get a better microphone. I do appreciate everything that everyone has done thus far.
- A grass roots communication program with up-to-date focus, programs, needs.
- Mailings to P.O Box only. Flier at post office worked great.

- The County and community have communication in place. I don't know however what the results of the meetings are.
- Encourage leaders of other groups to attend
- Phone trees for people who do not have Internet access.
- Neighborhood organizers – 20 households?
- Find out who stole the signs from the road announcing this meeting.
- Workshops not on Sunday at 12:00 Noon. –
- Keep Linda Dahl and Lisa Crosse as our Valley co-ordinators /
 - facilitator
 - administrators
- At this point I think you are doing a great job on these efforts.
- Keep communicating early and often.
- Was helpful to have signs up at P.O. on SFD
- Simplify as much as possible so message is clear –
- Where to go for more information –
