

DIVISION OF PUBLIC HEALTH
EMERGENCY MEDICAL SERVICES

February 2, 2012

EMS Colleagues,

Attached is the final draft of the Multiple Patient Management Plan and also the comments that were received on the first draft. There will be a 15 day comment period from February 10th to the 25th. Please limit your comments to the portions of the plan that were changed from the first draft, new text is underlined and old text is strike through. During review of the final draft if any major discrepancies are found please advise us. A comment sheet is also included; please reference page numbers and sections during your review.

Sections pertaining to FIRESCOPE will be updated when the newest version (which is being revised at this time) is available. The attachments will be updated separately and included when the plan is released for use. This plan is designed as a “living document” so that the newest versions of related regulations or plans are integrated into this plan when they are released.

The final plan will require training and exercising before it is adopted for use, we look forward to assisting EMS providers with training and intend to conduct a table top exercise at a minimum before adoption.

Respectfully,

Randy Saxe
EMS Specialist
