Program Services Division

California Outcomes Measurement System—Treatment (CalOMS Tx)

PREVIEW OF OUTCOME REPORTS

June 6, 2006

California Outcomes Measurement System--Treatment Preview of Outcome Reports

The Department of Alcohol and Drug Programs (ADP) is completing the phased roll-out of the output subsystem component of the California Outcomes Measurement System--Treatment (CalOMS Tx). The CalOMS Tx project is being implemented to achieve the following objectives:

- Effectively manage and improve the provision of treatment services provided to AOD clients at the State, county and provider levels.
- Meet federal and State reporting requirements, including reporting obligations to other State agencies.
- Report to the Administration, Legislature, federal government, county boards of supervisors, provider boards of directors and other third-party payers information regarding the effectiveness of AOD programs in California.

The CalOMS output subsystem contains all of the outcome reports and other informational tools that counties and direct providers will be able to use to more effectively analyze and interpret the AOD treatment data they have reported in CalOMS Tx.

The following pages contain a preview of the initial suite of reports that are now available within CalOMS Tx.

Outcome Reports—a series 16 reports that can provide thousands of different views of your CalOMS treatment data. This includes:

- **Assessing Services**
 - Source of Referral
 - Types of Service/Modality
 - Waiting List
- **Changes During Treatment**
 - Alcohol and Drug Use
 - Criminal Justice
 - Employment/Education
 - Living Arrangement
 - Medical/Health Issues
- Mental Health Issues
- Social Support Issues
- **Service Utilization**
 - Completion Rates
 - Length of Stay
- **Treatment Population**
 - Client Characteristics
 - Demographics
 - Parent and Child Status
 - Substance Use

Data Quality and Compliance Report—provides summary and supporting metrics regarding the timeliness, completeness, and accuracy of your CalOMS Tx data submissions.

Error and Submission Detail Report—provides record-by-record summaries of all errors encountered during your CalOMS Tx data submissions.

Open Admissions Report—lists all of your open AOD treatment admissions older than a user-selected number of months.

Services Provided Outside County Report—provides a listing of AOD treatment services performed by providers located outside your county at your request.

Parolee Services Network (PSN) Report—provides quarterly summary data on clients enrolled in this program; only applicable to counties participating in the PSN program. Note: this report is still being finalized and will be available starting approximately July 31, 2006.

- ❖ This report provides information about the source of referral for AOD treatment clients, including their court-ordered referral status.
- ❖ The data were collected during client admissions to AOD treatment that occurred during the selected reporting period and is based on service counts ("N") and not unique clients. This may result in multiple counts for the same client if they had more than one treatment admission during the selected reporting period.
- ❖ Use of the various report filters may yield small cell sizes which will undermine the report's usefulness since small changes in frequency produce large changes in percentages. Smaller cell sizes also increase the potential risk of communicating protected health information (PHI).

Important

Protect all CalOMS reports as PHI. At a minimum, such protections must comply with the privacy and security requirements defined in the rules of the Health Insurance Portability and Accountability Act (HIPAA) and Confidentiality of Alcohol and Drug Abuse Patient Records (42 CFR Part 2).

Notes:

(1) - Court Ordered is defined as SACPA, CDCI, DCP, Non SACPA Court, DUI/DWI.

Changes During Treatment, Alcohol and Drug Use (1)

California Outcomes Measurement System

Report Period: 3/1/2006 to 3/31/2006

Created By: Balbert

Service Modality: All

Date Created: 5/27/2006 12:37:22 PM

Special Population: All

Primary Drug: All

Treatment Frame: Service

Primary Group:

C/DCP: McKissoon County

Provider: C/DCP Wide

Comparison Group:

C/DCP: Statewide

Provider: C/DCP Wide

- ❖ This report provides information about the changes clients experienced in the use of their primary drug of choice—broken out in four categories: abstinence, reduction, no change, and increase—during the 30-day periods immediately prior to their admission to and discharge from AOD treatment. This includes summary and detailed client characteristics tables.
- ❖ Also included is a table that indicates the frequency of clients' alcohol use during the 30-day periods immediately prior to their admission to and discharge from AOD treatment for those clients whose primary and secondary drugs of choice were not alcohol.
- ❖ The data for this report were drawn from the records of all clients who had a completed "AOD treatment service set" (a matching admission and discharge—excluding administrative discharges) that occurred during the selected reporting period and had valid data in the relevant fields at both admission and discharge. This report excludes those client records that had alternative data values (e.g., 999xx codes) or were null (e.g., youth or detox admissions/discharges, CADDs-converted data, etc.) in the relevant fields.
- ❖ This report includes data for clients whose primary drug of choice identified at discharge was either the same as that identified at admission or was indicated as "None." This report excludes data for clients whose primary drug of choice at discharge was a different drug than that identified at admission.
- ❖ The data are based on service counts ("N") at two distinct points in time—during the 30-day periods immediately prior to their admission to and discharge from treatment. The data reflect each client's experience across the completed AOD treatment service set but not unique clients: for example, one client may have had more than one matching admission and discharge service set during the reporting period. This may result in multiple counts for the same client. Note: In those instances where the count at Admission is zero (0), the calculation of Percent Change is mathematically undefined and is currently shown as "0%" in this report.
- ❖ Use of the various report filters may yield small cell sizes which will undermine the report's usefulness since small changes in frequency produce large changes in percentages. Smaller cell sizes also increase the potential risk of communicating protected health information (PHI).

Important

Protect all CalOMS reports as PHI. At a minimum, such protections must comply with the privacy and security requirements defined in the rules of the Health Insurance Portability and Accountability Act (HIPAA) and Confidentiality of Alcohol and Drug Abuse Patient Records (42 CFR Part 2).

Notes:

(1) - This report shows client data where the client's primary drug identified at discharge was either the same primary drug identified at admission or "None".

(2) - For clients whose primary and secondary drug are not alcohol

Changes During Treatment, Criminal Justice

California Outcomes Measurement System

Report Period: 3/1/2006 to 3/31/2006

Created By: Balbert

Service Modality: All

Date Created: 5/27/2006 12:37:48 PM

Special Population: All

Primary Drug: All

Treatment Frame: Service

Primary Group:

C/DCP: McKissoon County

Provider: C/DCP Wide

Comparison Group:

C/DCP: Statewide

Provider: C/DCP Wide

- ❖ This report provides information about the changes clients experienced in their criminal justice involvement during the 30-day periods immediately prior to their admission to and discharge from AOD treatment.
- ❖ This includes a summary table and a detailed client characteristics table for all clients that had any form of criminal justice involvement during these periods—as measured by arrests, jail days, or prison days.
- ❖ The data for this report were drawn from the records of all clients who had a completed “AOD treatment service set” (a matching admission and discharge—excluding administrative discharges) that occurred during the selected reporting period and had valid data in the relevant fields at both admission and discharge. This report excludes those client records that had alternative data values (e.g., 999xx codes) or were null (e.g., youth or detox admissions/discharges, CADDs-converted data, etc.) in the relevant fields.
- ❖ The data are based on service counts (“N”) at two distinct points in time— the 30-day periods prior to their admission to and discharge from treatment. The data do not reflect the experience of unique clients across the treatment service set and, therefore, the “Percent Change” represents the change in proportion in the overall data pool as collected at each of these “snapshots in time.” This may result in multiple counts for the same client if they had more than one matching admission and discharge service set during the reporting period. Note: In those instances where the count at Admission is zero (0), the calculation of Percent Change is mathematically undefined and is currently shown as “0%” in this report.
- ❖ Use of the various report filters may yield small cell sizes which will undermine the report's usefulness since small changes in frequency produce large changes in percentages. Smaller cell sizes also increase the potential risk of communicating protected health information (PHI).

*****Important*****

Protect all CalOMS reports as PHI. At a minimum, such protections must comply with the privacy and security requirements defined in the rules of the Health Insurance Portability and Accountability Act (HIPAA) and Confidentiality of Alcohol and Drug Abuse Patient Records (42 CFR Part 2).

Provider: C/DCP Wide

- ❖ This report provides information about the changes clients experienced in their employment or educational/job training status between their admission to and discharge from AOD treatment. This includes summary and detailed client characteristics tables for employed and unemployed clients as well as those in school or undergoing job training.
- ❖ The data for this report were drawn from the records of all clients who had a completed "AOD treatment service set" (a matching admission and discharge—excluding administrative discharges) that occurred during the selected reporting period and had valid data in the relevant fields at both admission and discharge. This report excludes those client records that had alternative data values (e.g., 999xx codes) or were null (e.g., youth or detox admissions/discharges, CADDs-converted data, etc.) in the relevant fields, as well as records for clients under 16 years of age for the employment-related tables.
- ❖ The data are based on service counts ("N") at two distinct points in time—admission to and discharge from treatment. The data do not reflect the experience of unique clients across the treatment service set and, therefore, the "Percent Change" represents the changes in proportion in the overall data pool as collected at each of these "snapshots in time." This may result in multiple counts for the same client if they had more than one matching admission and discharge service set during the reporting period. Note: In those instances where the count at Admission is zero (0), the calculation of Percent Change is mathematically undefined and is currently shown as "0%" in this report.
- ❖ Use of the various report filters may yield small cell sizes which will undermine the report's usefulness since small changes in frequency produce large changes in percentages. Smaller cell sizes also increase the potential risk of communicating protected health information (PHI).

*****Important*****

Protect all CalOMS reports as PHI. At a minimum, such protections must comply with the privacy and security requirements defined in the rules of the Health Insurance Portability and Accountability Act (HIPAA) and Confidentiality of Alcohol and Drug Abuse Patient Records (42 CFR Part 2).

Notes:

(1) - For this report, the following tables report data for clients identified as "employed" if they are working "full time" (35 or more hours per week) or "part-time" (fewer than 35 hours per week).

(2) - Client counts may overlap between the three Employment/Education categories shown.

(3) - This table reports data for clients identified as unemployed, in the labor pool, and either seeking or not seeking employment. It does not include data on clients not in the labor pool.

Changes During Treatment, Living Arrangement

California Outcomes Measurement System

Report Period: 3/1/2006 to 3/31/2006

Created By: Balbert

Service Modality: All

Date Created: 5/27/2006 12:38:43 PM

Special Population: All

Primary Drug: All

Treatment Frame: Service

Primary Group:

C/DCP: McKissoon County

Provider: C/DCP Wide

Comparison Group:

C/DCP: Statewide

Provider: C/DCP Wide

- ❖ This report provides information about the changes clients experienced in the status of their living arrangements between their admission to and discharge from AOD treatment. This includes a summary table and a detailed client characteristics table for clients who were homeless.
- ❖ The data for this report were drawn from the records of all clients who had a completed "AOD treatment service set" (a matching admission and discharge—excluding administrative discharges) that occurred during the selected reporting period and had valid data in the relevant fields at both admission and discharge. This report excludes those client records that had alternative data values (e.g., 999xx codes) or were null (e.g., youth or detox admissions/discharges, CADDs-converted data, etc.) in the relevant fields.
- ❖ The data are based on service counts ("N") at two distinct points in time—admission to and discharge from treatment. The data do not reflect the experience of unique clients across the treatment service set and, therefore, the "Percent Change" represents the change in proportion in the overall data pool as collected at each of these "snapshots in time." This may result in multiple counts for the same client if they had more than one matching admission and discharge service set during the reporting period. Note: In those instances where the count at Admission is zero (0), the calculation of Percent Change is mathematically undefined and is currently shown as "0%" in this report.
- ❖ Use of the various report filters may yield small cell sizes which will undermine the report's usefulness since small changes in frequency produce large changes in percentages. Smaller cell sizes also increase the potential risk of communicating protected health information (PHI).

*****Important*****

Protect all CalOMS reports as PHI. At a minimum, such protections must comply with the privacy and security requirements defined in the rules of the Health Insurance Portability and Accountability Act (HIPAA) and Confidentiality of Alcohol and Drug Abuse Patient Records (42 CFR Part 2).

- ❖ This report provides information about the changes clients experienced in their medical/health status during the 30-day periods immediately prior to their admission to and discharge from AOD treatment.
- ❖ This includes a summary table and a detailed client characteristics table for all clients that had any form of medical/health issues during these periods—as measured by emergency room visits, overnight hospital stays, or other physical health problems.
- ❖ This report also includes a table regarding AOD clients' HIV/AIDS test status (at admission and at discharge), including whether clients had been tested for HIV/AIDS and, if tested, whether they had obtained the test results. Note: CalOMS does not collect nor does this report address the results of any HIV/AIDS tests that may have been taken.
- ❖ The data for this report were drawn from the records of all clients who had a completed "AOD treatment service set" (a matching admission and discharge—excluding administrative discharges) that occurred during the selected reporting period and had valid data in the relevant fields at both admission and discharge. This report excludes those client records that had alternative data values (e.g., 999xx codes) or were null (e.g., youth or detox admissions/discharges, CADDs-converted data, etc.) in the relevant fields.
- ❖ The data are based on service counts ("N") at two distinct points in time—the 30-day periods prior to their admission to and discharge from treatment (the HIV/AIDS test status table is measured at admission and discharge). The data do not reflect the experience of unique clients across the treatment service set and, therefore, the "Percent Change" represents the change in proportion in the overall data pool as collected at each of these "snapshots in time." This may result in multiple counts for the same client if they had more than one matching admission and discharge service set during the reporting period. Note: In those instances where the count at Admission is zero (0), the calculation of Percent Change is mathematically undefined and is currently shown as "0%" in this report.
- ❖ Use of the various report filters may yield small cell sizes which will undermine the report's usefulness since small changes in frequency produce large changes in percentages. Similar cell sizes also increase the potential risk of communicating protected health information (PHI).

Important

Protect all CalOMS reports as PHI. At a minimum, such protections must comply with the privacy and security requirements defined in the rules of the Health Insurance Portability and Accountability Act (HIPAA) and Confidentiality of Alcohol and Drug Abuse Patient Records (42 CFR Part 2).

Changes During Treatment, Mental Health Issues

California Outcomes Measurement System

Report Period: 3/1/2006 to 3/31/2006

Created By: Balbert

Service Modality: All

Date Created: 5/27/2006 12:39:41 PM

Special Population: All

Primary Drug: All

Treatment Frame: Service

Primary Group:

C/DCP: McKissoon County

Provider: C/DCP Wide

Comparison Group:

C/DCP: Statewide

Provider: C/DCP Wide

- ❖ This report provides information about the changes clients experienced in their mental health status during the 30-day periods immediately prior to their admission to and discharge from AOD treatment.
- ❖ This includes a summary table and a detailed client characteristics table for all clients that had any form of mental health issues during these periods—as measured by receiving outpatient emergency services for mental health needs, 24-hour hospital or psychiatric facility stays, or taking prescribed medication for mental health needs.
- ❖ The data for this report were drawn from the records of all clients who had a completed “AOD treatment service set” (a matching admission and discharge—excluding administrative discharges) that occurred during the selected reporting period and had valid data in the relevant fields at both admission and discharge. This report excludes those client records that had alternative data values (e.g., 999xx codes) or were null (e.g., youth or detox admissions/discharges, CADDs-converted data, etc.) in the relevant fields.
- ❖ The data are based on service counts (“N”) at two distinct points in time— the 30-day periods prior to their admission to and discharge from treatment. The data do not reflect the experience of unique clients across the treatment service set and, therefore, the “Percent Change” represents the change in proportion in the overall data pool as collected at each of these “snapshots in time.” This may result in multiple counts for the same client if they had more than one matching admission and discharge service set during the reporting period. Note: In those instances where the count at Admission is zero (0), the calculation of Percent Change is mathematically undefined and is currently shown as “0%” in this report.
- ❖ Use of the various report filters may yield small cell sizes which will undermine the report's usefulness since small changes in frequency produce large changes in percentages. Smaller cell sizes also increase the potential risk of communicating protected health information (PHI).

*****Important*****

Protect all CalOMS reports as PHI. At a minimum, such protections must comply with the privacy and security requirements defined in the rules of the Health Insurance Portability and Accountability Act (HIPAA) and Confidentiality of Alcohol and Drug Abuse Patient Records (42 CFR Part 2).

- ❖ This report provides information about the changes clients experienced in the status of three social support indicators during the 30-day periods immediately prior to their admission to and discharge from AOD treatment.
- ❖ This includes a summary and a detailed client characteristics table for each of the three social support indicators, including whether the client: was living with an AOD user, had not participated in any social support activities (e.g., 12-step programs; other religious, community, self-help meetings, etc.), or had experienced serious family conflicts.
- ❖ The data for this report were drawn from the records of all clients who had a completed "AOD treatment service set" (a matching admission and discharge—excluding administrative discharges) that occurred during the selected reporting period and had valid data in the relevant fields at both admission and discharge. This report excludes those client records that had alternative data values (e.g., 999xx codes) or were null (e.g., youth or detox admissions/discharges, CADDs-converted data, etc.) in the relevant fields.
- ❖ The data are based on service counts ("N") at two distinct points in time— the 30-day periods prior to their admission to and discharge from treatment. The data do not reflect the experience of unique clients across the treatment service set and, therefore, the "Percent Change" represents the change in proportion in the overall data pool as collected at each of these "snapshots in time." This may result in multiple counts for the same client if they had more than one matching admission and discharge service set during the reporting period. Note: In those instances where the count at Admission is zero (0), the calculation of Percent Change is mathematically undefined and is currently shown as "0%" in this report.
- ❖ Use of the various report filters may yield small cell sizes which will undermine the report's usefulness since small changes in frequency produce large changes in percentages. Smaller cell sizes also increase the potential risk of communicating protected health information (PHI).

*****Important*****

Protect all CalOMS reports as PHI. At a minimum, such protections must comply with the privacy and security requirements defined in the rules of the Health Insurance Portability and Accountability Act (HIPAA) and Confidentiality of Alcohol and Drug Abuse Patient Records (42 CFR Part 2).

Service Utilization, Completion Rates

California Outcomes Measurement System

Report Period: 3/1/2006 to 3/31/2006

Created By: Balbert

Service Modality: All

Date Created: 5/27/2006 12:40:34 PM

Special Population: All

Primary Drug: All

Fiscal Year: 2005-06

Primary Group:

C/DCP: McKissoon County

Provider: C/DCP Wide

Comparison Group:

C/DCP: Statewide

Provider: C/DCP Wide

- ❖ This report provides information about the treatment completion rates experienced by AOD treatment clients, including detailed characteristics about clients who did and who did not complete their treatment.
- ❖ The data were collected during client discharges from AOD treatment that occurred during the selected reporting period and is based on service counts ("N") and not unique clients. This may result in multiple counts for the same client if they had more than one treatment discharge during the selected reporting period.
- ❖ This report excludes data for clients whose discharges were due either to the client's death or incarceration.
- ❖ Use of the various report filters may yield small cell sizes which will undermine the report's usefulness since small changes in frequency produce large changes in percentages. Smaller cell sizes also increase the potential risk of communicating protected health information (PHI).

Important

Protect all CalOMS reports as PHI. At a minimum, such protections must comply with the privacy and security requirements defined in the rules of the Health Insurance Portability and Accountability Act (HIPAA) and Confidentiality of Alcohol and Drug Abuse Patient Records (42 CFR Part 2).

Notes:

(1) - The following data does not include clients who left before treatment completion due to death or incarceration.

Comparison Group:

C/DCP: Statewide

Provider: C/DCP Wide

- ❖ This report provides information about AOD treatment client characteristics in the following categories: employment status, education level, legal status, special needs, HIV/AIDS test status, and communicable disease diagnosis.
- ❖ The table regarding AOD clients' HIV/AIDS test status indicates whether clients were tested for HIV/AIDS and, if tested, whether they obtained the test results. Note: CalOMS does not collect nor does this report address the results of any HIV/AIDS tests that may have been taken.
- ❖ The data were collected during client admissions to AOD treatment that occurred during the selected reporting period and is based on service counts ("N") and not unique clients. This may result in multiple counts for the same client if they had more than one treatment admission during the selected reporting period.
- ❖ Use of the various report filters may yield small cell sizes which will undermine the report's usefulness since small changes in frequency produce large changes in percentages. Smaller cell sizes also increase the potential risk of communicating protected health information (PHI).

*****Important*****

Protect all CalOMS reports as PHI. At a minimum, such protections must comply with the privacy and security requirements defined in the rules of the Health Insurance Portability and Accountability Act (HIPAA) and Confidentiality of Alcohol and Drug Abuse Patient Records (42 CFR Part 2).

- ❖ This report provides information about the parental status of AOD treatment clients, including clients with minor children, parental rights and child custody, and the unique number of minor children of AOD clients.
- ❖ The data were collected during client admissions to AOD treatment that occurred during the selected reporting period and is based on service counts ("N") and not unique clients (except where noted in the final table—Actual Number of Minor Children of Unique Clients). This may result in multiple counts for the same client if they had more than one treatment admission during the selected reporting period.
- ❖ Use of the various report filters may yield small cell sizes which will undermine the report's usefulness since small changes in frequency produce large changes in percentages. Smaller cell sizes also increase the potential risk of communicating protected health information (PHI).

Important

Protect all CalOMS reports as PHI. At a minimum, such protections must comply with the privacy and security requirements defined in the rules of the Health Insurance Portability and Accountability Act (HIPAA) and Confidentiality of Alcohol and Drug Abuse Patient Records (42 CFR Part 2).

Notes:

(1) - This report includes the total number of clients' minor children. It does not indicate the number of minor children in treatment or accompanying the parent/client to treatment.

Report Period: 3/1/2006 to 3/31/2006

Created By: Balbert

Service Modality: All

Date Created: 5/27/2006 12:43:25 PM

Special Population: All

Primary Drug: All

Fiscal Year: 2005-06

Primary Group:

C/DCP: McKissoon County

Provider: C/DCP Wide

Comparison Group:

C/DCP: Statewide

Provider: C/DCP Wide

- ❖ This report provides information about the primary and secondary drugs of choice for AOD treatment clients, including route of administration, frequency of use, age of first use, and the number of prior treatment episodes.
- ❖ The data were collected during client admissions to AOD treatment that occurred during the selected reporting period and is based on service counts ("N") and not unique clients. This may result in multiple counts for the same client if they had more than one treatment admission during the selected reporting period.
- ❖ Use of the various report filters may yield small cell sizes which will undermine the report's usefulness since small changes in frequency produce large changes in percentages. Smaller cell sizes also increase the potential risk of communicating protected health information (PHI).

*****Important*****

Protect all CalOMS reports as PHI. At a minimum, such protections must comply with the privacy and security requirements defined in the rules of the Health Insurance Portability and Accountability Act (HIPAA) and Confidentiality of Alcohol and Drug Abuse Patient Records (42 CFR Part 2).

Data Quality and Compliance Report

California Outcomes Measurement System

C/DCP: McKissoon County

Report Month: March 2006

Reference Month: March 2006

NTP: Yes

Created By: BILLGOLIVE

Date Created: 6/6/2006 9:24:54 AM

- ❖ This report provides information to enable counties and direct providers to monitor and evaluate their performance in meeting established CalOMS data quality and compliance reporting standards.
- ❖ The report includes a high-level summary overview that indicates whether the county's or direct provider's CalOMS performance is compliant based on five measures that address CalOMS data quality standards for timeliness, completeness, and accuracy.
- ❖ Three support tables are included so counties and direct providers can monitor and evaluate the underlying data being measured.

*****Important*****

Protect all CalOMS reports as protected health information (PHI). At a minimum, such protections must comply with the privacy and security requirements defined in the rules of the Health Insurance Portability and Accountability Act (HIPAA) and Confidentiality of Alcohol and Drug Abuse Patient Records (42 CFR Part 2).

Data Quality Measures Performance Summary for Selected Report Month

Compliant?	Measure & Description
NO	TM-1: Total Late Submissions shall not exceed 5% for any report month.
---	TM-2: Total Late Re-Submissions shall not exceed 5% for any report month.
NO	CM-1: # Not Reporting (number of providers not reporting service or no activity) shall equal 0 for each report month.
Yes	CM-2: Total % Records Late shall not exceed 1% for each report month as measured in the 6th submission month.
Yes	AM-1: % Records Rejected shall not exceed 5% for each report month.

USE GUIDE: This summary provides an "at-a-glance" view of your performance on ADP's data quality measures for the selected Report Month. Use subsequent pages to explore failures identified in this summary or for ongoing monitoring of data quality information. "----" indicates that this measure cannot be evaluated yet.

USE GUIDE: Use this summary to track metrics for the selected report month as compared to prior report months and the same month last year. You can track record volume (Total Records Received) as well as general metrics on timeliness (On-Time, Late). You can also see if admissions and discharges are in balance (Adm/Discharge Ratio) and how well your providers are reporting.

USE GUIDE: Use this summary to view the flow of Submissions and Re-submissions for the selected Report month. Flow is presented for a series of months (Submission Window) in which the data is submitted for the selected Report Month. Use the "Reference Month", when creating this report, to select the first month in the Submission Window. Use this Data Completeness Summary to better understand the flow of Submission and Re-Submission data that contribute to this Data Timeliness summary.

Error and Submission Details Report

Admissions older than 6 month(s)

Date Created: 6/6/2006 9:26:50 AM

- ❖ This report provides information about open AOD treatment admissions for which a valid, corresponding discharge or annual update has not been received.
- ❖ The report provides the following information regarding each open admission: provider ID, number of months open, service modality, admission date, last annual update date (if applicable), form serial number, and provider's participant ID.

*****Important*****

Protect all CalOMS reports as protected health information (PHI). At a minimum, such protections must comply with the privacy and security requirements defined in the rules of the Health Insurance Portability and Accountability Act (HIPAA) and Confidentiality of Alcohol and Drug Abuse Patient Records (42 CFR Part 2).

Services Provided Outside County

California Outcomes Measurement System

Report Period: 1/1/2005 to 1/1/2006

Created By: rprice

County: McKissoon County

Date Created: 3/13/2006 11:56:47 AM

- ❖ This report provides information about AOD treatment services performed for a county by providers located outside the county.
- ❖ The report provides the following information regarding each AOD treatment admission being provided by the out-of-county providers: provider ID, provider name, provider participant ID, form serial number, admission date, and special services contract number (if applicable).
- ❖ This report can be used by the paying county to verify that the resulting AOD client treatment admission data, for the treatment services for which they have paid, has been successfully reported to the CalOMS system.

*****Important*****

Protect all CalOMS reports as protected health information (PHI). At a minimum, such protections must comply with the privacy and security requirements defined in the rules of the Health Insurance Portability and Accountability Act (HIPAA) and Confidentiality of Alcohol and Drug Abuse Patient Records (42 CFR Part 2).
