

## **Vineyard Creek Project Update (9/13/07):**

The plans for the 2008 Vineyard Creek Improvement Project will be 95% completed with the New Year. Staff is working closely with permitting agencies and design consultant, Winzler & Kelly to keep this project on schedule.

The revegetation planting scheduled for this year has been incorporated in the 2008 project to reduce cost with the scale of work in 2008 and to ensure the watering infrastructure did not need to be modified with the final 2008 configuration. Currently, Winter Storm preparedness actions for Vineyard Creek are being planned and will be in place before the winter rains.
